Gemini and NotebookLM

Gemini for Education and NotebookLM

Launch	Product/feature description	Edition	Availability
Gemini for Education			
Study and learn more effectively with study notebooks in Gemini	Turn Gemini into an adaptive learning platform for every student. With study notebooks, students take a diagnostic quiz to identify knowledge gaps. Gemini will then build a personalized path with bite-sized lessons to help students build knowledge and track their progress. Learn more	All editions	Available now to students and educators on their personal accounts (desktop only) Will soon be available globally on school-issued accounts
Help students prep for standardized test with new practice tests in Gemini	Support students during critical college and graduate school application milestones. Gemini will soon support full length, no-cost practice GRE and ACT tests, grounded in authoritative content from The Princeton Review. Gemini will also support Akira ENEM tests soon. Learn more	All editions	Will be available globally in the coming weeks
Organize chats and projects with notebooks in Gemini	Students and educators will soon be able to use notebooks in Gemini to organize their chats and projects for an easier workflow when learning and working. Learn more	All editions	Will be available globally in the coming weeks
Experience a brand-new look and feel with Neural Expressive	Discover a completely redesigned Gemini interface built for the AI era. Neural Expressive, our new design language, brings learning to life with vibrant colors, fluid animations, dynamic layouts, and haptic feedback that responds to your touch. Learn more	All editions	Available globally
Start quick, one-off temporary chats in Gemini	Perform one-off tasks without cluttering your recent chats. With temporary chats, chats with Gemini won't save to history, though admins can still access them in Google Vault for school compliance. Learn more	All editions	Available globally

Gemini for Education and NotebookLM

Launch	Product/feature description	Edition	Availability
Gemini for Education			
Manage retention rules and litigation holds for Gemini in Google Vault	Use Vault to set retention rules and holds for Gemini. Admins can search app conversations across the domain, place messages on hold, and export search results, making it easier to comply with data obligations from a central tool. Learn more	All editions	Available globally
Tackle tasks with the Google Classroom app in Gemini	The Classroom app in Gemini allows educators to securely use context from their Google Classroom to help them with teaching tasks , like identifying learning gaps, drafting notes, or differentiating content. Access is controlled by a new setting in Admin console. Learn more	All editions	Available globally in English, 18+
Share Gemini chats and Canvas creations securely with Drive	Share Gemini chats, canvases, and generated media directly and securely via Drive. This update makes it easy for educators and staff to exchange ideas and resources across your institution, while giving admins full control to manage sharing and privacy settings. Learn more	All editions	Available globally
Share Gemini Canvas creations to Classroom	Streamline your workflow by sending your creations straight to Google Classroom seamlessly adding interactive artifacts directly into classes.	All editions	Available globally

Gemini for Education and NotebookLM

Launch	Product/feature description	Edition	Availability
Gemini for Education			
Create custom educational videos with Gemini Omni	Experience where Gemini's ability to reason meets the ability to create. Combine text, images, video, and audio to easily generate and edit high-quality educational videos grounded in real-world knowledge. Bring complex subjects to life with simple prompts. Learn more	Google AI Pro for Education	Available globally
Personalize videos with your digital avatar	Drop into the action by creating a custom AI avatar that looks and sounds like you. Streamline content creation and deliver tailored, engaging instruction in Gemini Omni videos while maintaining a personal connection. Learn more	Google AI Pro for Education	Will be available globally in English in the coming weeks (exceptions: EEA, Switzerland, and UK), 18+
Spot AI-generated media with expanded verification tools	Help students and educators check if media is original or AI-generated. Expanding upon SynthID in the Gemini app, we're bringing Content Credentials to Gemini too – and rolling out these verification capabilities to Google Search and Chrome. Learn more	All editions	Available globally

Gemini for Education and NotebookLM

Launch	Product/feature description	Edition	Availability
Gemini LTI™			
Gemini LTI™ for Moodle and expanded capabilities in other LMS	Support students and educators across more platforms with the arrival of Gemini LTI for Moodle, alongside expanding guided AI activities for tools like Google NotebookLM. • Moodle: Access the Gemini app and NotebookLM directly in Moodle and upload your class sources manually to get started. • PowerSchool Schoology Learning: Class materials are automatically synced when creating teacher-led AI experiences, and anticipate student-level insights for NotebookLM in the coming months. • Canvas by Instructure: Class materials will automatically sync when creating teacher-led AI experiences and teachers will get student-level insights for NotebookLM in the coming months. Learn more	All editions	Available globally

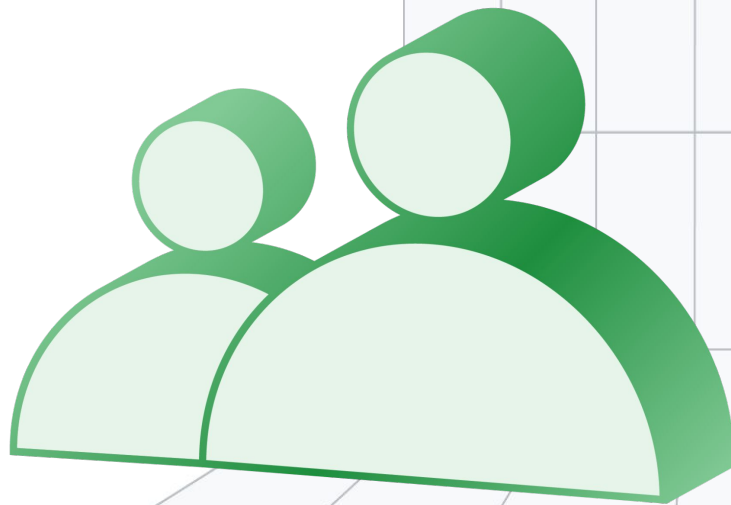

Gemini for Education and NotebookLM

Launch	Product/feature description	Edition	Availability
NotebookLM			
Customize your Mind Maps	Tailor a Mind Map by specifying a particular topic, restricting the focus to a specific source document, or directing it to target key concepts. Simply input your desired theme or constraints into the customization prompt.	All editions	Available globally
Easily share your content with public notebooks	Educational institutions can now share notebooks publicly to easily share their curated content and connect their community to high-quality research. Admins remain in control and can decide who in their organization can share publicly. Learn more	All editions	Will be available globally in the coming weeks
Keep notebooks up to date with automatic Google Drive syncing	Save time and skip having to manually upload your sources every time there's an update. NotebookLM now automatically syncs with Drive, updating your notebooks as changes are made to uploaded Docs, Sheets, or Slides. Learn more	All editions	Available globally

Gemini

Gemini in Classroom for educators

Launch	Product/feature description	Edition	Availability
Creating teacher-led AI learning experiences Introducing the next chapter of teacher-led AI tools. Guided by educators , our newest features are built to scale personalized learning, are rooted in curriculum , and deliver the actionable insights you need to consistently keep a pulse on student growth.			
Help students deepen their understanding with teacher-led Guided Learning in Classroom	Provide students with extra support with Gemini's Guided Learning directly in Classroom – a tool that breaks down problems step-by-step and encourages students to develop their own thinking, rather than giving the answer. This feature is proven to drive learning outcomes , offering real-time support when students struggle with concepts. At the same time, educators gain instructional insights and students stay focused with a distraction-free view. Learn more	All editions	Will be available globally in all supported languages for Gemini
Create teacher-led study notebooks in Gemini	Make interactive, adaptive study notebooks in Gemini grounded in Classroom materials. Students start with a diagnostic quiz, then Gemini builds a personalized path with bite-sized lessons to help them master concepts. Learn more	All editions	Will be available globally in all supported languages for Gemini
Transform instruction with teacher-led Google NotebookLM in Classroom	Bringing NotebookLM to Classroom last year enabled educators to transform existing materials into interactive study guides, flashcards, and podcasts to support student understanding. Soon, educators will gain actionable insights into student interactions to inform instruction. Learn more	All editions	Will be available globally in all supported languages for Google NotebookLM

Gemini

Gemini in Classroom for educators

Launch	Product/feature description	Edition	Availability
New features for educators on the Gemini tab for educators			
Experience a refreshed Gemini tab for educators	The Gemini tab now has a cleaner layout that separates primary features from starter prompts. This updated hub makes it quicker for educators to find exactly what they need to prepare for class. • Access Gemini features in a variety of new languages and locales. • Make lessons more visual with Nano Banana starter prompts, and quickly generate infographics, storytelling elements, and visual aids. • Fast-track your presentations with the Google Slides deck starter prompts. Instantly generate a Slides presentation or an activity built around your instructions to cut down on prep time. • Select class materials for more tailored support from within the Gemini tab to streamline lesson preparation and administrative tasks by easily pulling relevant course materials straight into a centralized location for educators.	All editions	Will be available globally for teachers
Saving time throughout teacher workflows			
Generate a rubric in the assignment creation workflow	Streamline grading setup by using AI-powered tools to instantly generate custom rubrics directly within the assignment creation workflow.	Teaching and Learning add-on Education Plus	Available globally in English
Turn Classroom insights into action with tailored suggestions in Gemini	Use tailored Gemini suggestions to instantly draft personalized check-in emails, build catch-up plans, or generate targeted practice materials directly from your class insights.	Teaching and Learning add-on Education Plus	Coming soon globally

Gemini in Google Classroom

Gemini in Classroom for students

Launch	Product/feature description	Edition	Availability
New features for students on the Gemini tab for students			
Support students with Gemini in Classroom – now available for all ages	For students with access to Gemini or NotebookLM, the Gemini tab in Classroom now provides a more central destination for students to learn with AI. Vetted by pedagogy and safety experts, this tab lets students use their course materials to learn by creating custom study guides and quizzes, and through Guided Learning. Learn more • Give students a central destination to use Gemini to support their learning. • Sync class content with NotebookLM notebooks to create study guides, flashcards, podcasts, and quizzes tailored to specific subjects – from biology and chemistry to literature and history. Learn more • Help students study on the go with the expanded Gemini tools in the Classroom mobile app. With new starter prompts, students can seamlessly connect to features designed for independent exam prep and skill practice.	All editions	Will be Available globally for students of all ages in all supported languages for Classroom and Gemini

Google Classroom

Launch	Product/feature description	Edition	Availability
Instructional support			
Tackle tasks with the Classroom app in Gemini	With the Classroom app in Gemini, educators can now use class context – including assignments, grades, and materials – to streamline teaching tasks like analyzing student progress and drafting tailored activities. Access is controlled by a new setting in Admin console. Learn more	All editions	Available globally in English, 18+
A universal connection for your EdTech tools with Google Classroom's MCP server	We know teachers thrive when their favorite tools work together. In the coming months, we're launching a Google Classroom Model Context Protocol (MCP) server. This allows external EdTech platforms to build connection points to securely reference Classroom context, keeping daily workflows unified while unlocking new ways of teaching tailored to their class.	N/A	Will be available globally in English
Keep track of student progress with learning standards and skills in Classroom	Bring your learning standards to Classroom. To support data-driven instruction, we partnered with 1EdTech and Common Good Learning Tools to enable educators to tag coursework with relevant learning standards or skills and view new analytics of student performance. Learning standards and skills are published on Satchel Rosetta Exchange , including NGSS, ISTE, ACT, SAT Suite Standards, among others. Learn more	All editions	Available now Learning standards: United States, Canada, United Kingdom, Brazil, Japan, Mexico, Italy, and Australia. Learning skills: English, French, Spanish, Italian, Japanese, Korean, Malay, and Brazilian Portuguese.
Stay organized with collapsible topics on the Classwork page	Easily collapse and expand topics on the Classwork page to customize your view. This helps educators and students keep their assignment lists organized and free of clutter. Learn more	All editions	Available globally

Google Classroom

Launch	Product/feature description	Edition	Availability
Homepage redesign			
Empower school leaders with the Classroom homepage: Admin view	Monitor key performance analytics, use shortcuts to backend administrative settings, and support your educators and staff directly from one centralized location.	All editions	Will be available globally
Supercharge daily prep with the Classroom homepage: Teacher view	Identify students who need targeted support, track assignment completion, and use Gemini tools to spark fresh instructional ideas.	All editions	Available globally
Support student agency with the Classroom homepage: Enrolled view	Help learners manage their own deadlines and launch personalized study tools.	All editions	Available globally
Classroom add-ons			
Engage students with Quizlet add-on in Classroom	Create bite-sized in-class or at-home activities by assigning Quizlet flashcards, practice questions, and games. Easily monitor class results and engagement – without ever leaving Classroom. Learn more	Teaching and Learning add-on Education Plus	Available globally
Promote academic integrity with Turnitin Feedback Studio add-on in Classroom	Integrate Turnitin into Google Classroom seamlessly. This allows instructors to easily enable Turnitin integrity checks on Classroom assignments, share targeted feedback, and grade student work using Turnitin Feedback Studio. Learn more	Teaching and Learning add-on Education Plus	Available globally

Launch	Product/feature description	Edition	Availability
Read Along in Classroom			
Now available for all education customers: Read Along in Classroom	Read Along in Classroom is now available across all Google Workspace for Education editions, including Education Fundamentals. Help students build literacy skills with real-time support and reading insights. Advanced analytics, like viewing student's progress over time or across assignments and the ability to extract data via BigQuery, are only available with Education Plus and Teaching & Learning add-on. Learn more	All editions	Available globally in English (American, Australian, British), Arabic, Bahasa Indonesia, Brazilian Portuguese, Malay, Spanish, Thai, Urdu
Now available in Italian, Hindi, Telugu, Gujarati	Students can now read content and get reading support in Italian, Hindi, Telugu, Gujarati.	All editions	Available globally
Enjoy more natural-sounding voices in Read Along	The built-in reading buddy in Read Along now has more human-like narration to help minimize listening fatigue, model fluent decoding, and bring the story's emotional cues to life.	All editions	Available now for listening mode, and across all reading modes in the coming weeks for English (American, Australian, British), Arabic, Brazilian Portuguese, Spanish, Urdu
Transform your PDFs into Read Along books	Make your existing reading assignments more interactive. Easily transform your favorite assignments in PDF format – even those with images – into interactive Read Along activities.	All editions	Will be available globally in English in the coming months
Imagine illustrated stories with Gemini	Right from within Read Along in Classroom, generate custom reading material and vibrant visuals instantly using Gemini to captivate your students.	All editions	Will be available globally in English in the coming months
Find stories faster with search & filtering	You can now search and filter directly from the library screen when building your classroom assignments. Learn more	All editions	Available globally

Google Workspace for Education

Gemini in Google Workspace

Google Workspace
with  Gemini

Launch	Product/feature description	Edition	Availability*
Introducing Workspace Intelligence , with admin controls	Workspace Intelligence grounds your AI tasks in your Google Workspace data – and it's now on by default in Admin console. Admins can easily control which sources – like Gmail, Drive, Chat, or Calendar – can be searched to power this feature. Learn more	Education Plus Teaching and Learning add-on Google AI Pro for Education	Available globally, 18+
Streamline writing with custom instructions for Gemini in Docs	Gemini can now adapt to your style, tone, and formatting preferences in Docs – no need to repeat your instructions. Set instructions to ensure consistent responses across your class documents. Learn more	Education Plus Teaching and Learning add-on Google AI Pro for Education	Available globally, 18+
Add Gems to Google Workspace Studio flows	The new “Ask a Gem” step in Google Workspace Studio enables your workflows to send prompts to Gems to automate tasks like drafting lesson plans or summaries – and it works with any Gem that has Drive files in its knowledge base. Learn more	All editions	Available globally, 18+
Use NotebookLM in Google Workspace Studio	NotebookLM is now integrated into Google Workspace Studio. With the new “Ask NotebookLM” step, you can generate grounded responses for study guides or lesson plans based on the insights, summaries, and research in your notebooks. Learn more	All editions	Available globally, 18+
Add avatars when you convert presentations to Vids	You can now add an AI avatar to your videos to make them even more engaging and relatable. This builds on existing presentation capabilities, such as using Gemini to generate scripts, voiceovers, and background music. Learn more	Education Plus Teaching and Learning add-on Google AI Pro for Education	Available globally, 18+

Gemini in Google Workspace

Google Workspace
with  Gemini

Launch	Product/feature description	Edition	Availability*
Create custom avatars in Vids with Nano Banana 2	Nano Banana 2 now allows you to upload an institutional logo of your choice to brand your custom avatars in Vids, helping you ensure a consistent school identity across all of your institution's videos. Learn more	Education Plus, Teaching and Learning add-on Google AI Pro for Education	Available globally, 18+
Use “Create” in Google Workspace Studio to build Docs & Slides	Bring the power of Gemini in Docs and Slides into your Google Workspace Studio flows. The “Create” step lets you use simple prompts and reference materials to automate rich content creation and lesson planning workflows in Docs and Slides.	All editions	Will be available globally in the coming weeks, 18+
Experience the reimagined Gemini in Docs	Gemini in Docs has been reimagined to help you create fully formatted first drafts tailored for your classroom. Use “Help me write” in the new bottom bar or side panel to maintain your tone and style, edit across your document, and match formatting of a source document. Learn more	Google AI Pro for Education	Available globally, 18+
Get a holistic view of your academic work with Ask Gemini in Drive	View all of your lesson plans, assignments, and research with Ask Gemini in Drive. Use natural, multi-turn conversations to explore and understand content across Drive, Google Workspace, and the web. Learn more	Google AI Pro for Education	Available globally, 18+
Get instant answers from your files with AI Overviews in Drive	AI Overviews in Drive remove the need to search through endless files and tabs to get the info you need. Gemini scans your documents and provides concise, accurate summaries at the top of your search results. Learn more	Google AI Pro for Education	Available globally, 18+

Gemini in Google Workspace

Google Workspace
with  Gemini

Launch	Product/feature description	Edition	Availability*
Find the right information fast with AI Overviews in Gmail	Type your questions into Gmail's search bar and get clear answers across multiple conversations. Educators can save time and find the information they need fast, without digging through fragmented email threads. Learn more	Google AI Pro for Education	Available globally, 18+
Create more personalized emails with Help me write in Gmail	Save time and create impactful, personalized emails. Help me write can now pull relevant information directly from Drive and Gmail to tailor drafts that match the tone of your past school communications. Learn more	Google AI Pro for Education	Available globally, 18+
Explore new ways to customize AI-generated notes in Google Meet	"Take notes for me" is now more customizable. Toggle sections on or off for school meetings, including "Summary," "Next steps," "Details," and a brand-new "Decisions" section that tracks statuses and outcomes. Learn more	Google AI Pro for Education	Available globally, 18+
Quickly build and edit complex spreadsheets with Gemini in Sheets	Use simple, natural language prompts to build entire formatted spreadsheets. Gemini in Sheets synthesizes data and helps construct a plan for your approval for complex projects like organizing lessons and student data analysis. Learn more	Google AI Pro for Education	Available globally, 18+
Automate data entry in Sheets using Fill with Gemini	Fill with Gemini is a new feature that makes data prep and entry quicker and easier. It handles the heavy lifting, with no need for complex formulas, so you can populate everything from grades, rosters, and schedules 9x faster than manual entry.** Learn more	Google AI Pro for Education	Available globally, 18+
