EDITORIAL NOTICE

This batch of *Circulars* contains number 100 000, some 31 years after number 10 000 was published. This milestone would have been reached many years ago, except that a lot of material that traditionally had appeared in this journal was transferred to two new journals: the *MPS* in 1997; and the *MPO* in 2000. The total number of pages published in these two journals is around 1.1 million.

The Working Group on Small-Body Nomenclature has voted to change the name of comet P/2015 PD229 to "Cameron-ISON". This notice was included in the ASCII version of the April *MPCs*, but was omitted from the PDF version.

NEW OBSERVATORY CODES

The following listing is a continuation to that on *MPC* 99359. The longitudes λ are measured in degrees eastward from Greenwich, and the parallax constants $\rho\cos\phi'$ and $\rho\sin\phi'$ are the product of the geocentric distance (in earth equatorial radii) and the cosine and sine, respectively, of the geocentric latitude.
